SMART GOAL: SMART GOAL: During the 2014-2015 School year, technology will be utilized to enhance student learning and professional development. In 1981, an article by George Doran, There's a S.M.A.R.T. Way to Write Management's Goals and Objectives, appeared in Management Review. It outlined principles for setting SMART goals in education that help students and educators develop clear objectives. Doran's framework includes the following criteria for SMART goals:

- Specific: Clearly define the goal.
- Measurable: Include metrics to measure progress.
- Achievable: Set realistic goals.
- Relevant: Align the goal with broader objectives.
- Time-bound: Establish a deadline to achieve the goal.

Using the concept of SMART goals to help write goals that are actionable and able to be achieved is crucial. However, an obstacle may be that the technology you are adopting has not yet been fully integrated into your institution.
